

REAL ESTATE BARGAINS

- 40 acres of first class land, full water right, only three miles from town, 15 acres under cultivation, nicely located. \$1,000 down, balance on time to suit purchaser. A SNAP.
- 40 acres raw land, with 20 acres water right; close in and right on river. \$1000; half down and balance on time.
- 40 acres, mile and one-half from town. Real truck garden. Will sell in any sized tracts. Small payment down, balance on time to suit purchaser.
- 115 acres, close to good town, 30 acres in cultivation, water right for same, price \$1500; \$1000 down, balance on time. This is like getting money from home.
- 20 acres, two miles from town, all in alfalfa, first-class water right, on State highway. Choice land, fine location.
- 40 acres close in to large coal camp, good business property. Water can be had by digging well; other business houses across the road from this snap. \$1500 cash. \$2000, part cash and balance on time. You should see this.
- 80 acres near East Hiawatha coal camp; good business property; also good running for milch cows, goats or sheep. Will sell in any sized tract.
- 40 acres nice level land near Black Hawk coal mining camp. Will sell as a whole or part, at reasonable figure, for cash or on time.
- 1 acre land right close in, Utah mine coal camp. Will sell cheap. This is good business location.

McDonald Real Estate and Investment Company

RESOLUTION.

W. T. Hamilton moved the adoption of the following resolution:

Whereas, pursuant to the law, the treasurer of Carbon county, received in payment of taxes imposed to meet the county's expenses for the year 1912-1914 certain outstanding warrants of the issue of the year 1912, and preceding years, aggregating \$12,116.48 thereby depleting the county treasury by that amount, and rendering the county unable to pay loans to that amount advanced from time to time during the year 1914 by the Helper State bank for the purpose of paying the county's expenses of that year as they became due, and

Whereas, the Seventh Judicial district court declared valid against the county a certain warrant issued to M. S. Nelson of Mount Pleasant, Utah, in payment of a loan of \$17,454.54 made by him to the county in the year 1911, and;

Whereas, there are still outstanding and unpaid other warrants of the county issued during the year 1912 and preceding years, aggregating \$12,244.72, and;

Whereas, the county is indebted in the following sums: The sum of \$2800.00, the sum of \$1258.00, the sum of \$2600.00, the said sums having been appropriated for the Willow Creek road, the Helper bridge, and the state road commission, and

Whereas, there is filed with the county clerk certain claims for labor and material furnished to the county during the year 1912, aggregating \$2172.15 for which warrants were not approved and issued respectively by the board of commissioners and clerk of that year, all of which warrants and claims aggregate a total county indebtedness of \$43,222.65, the greater part of such indebtedness is good in payment of county taxes and therefore liable to jeopardize the county's revenues for the current year, in like manner as the above said outstanding warrants jeopardized the county credit for the years 1912 and 1914, and;

Whereas, such jeopardizing of the county's credit can be avoided only as follows, to-wit:

1. By a special levy upon the property of the taxpayers of the county sufficient to realize the sum of \$19,222.65 during the year 1915, or
2. By the sale of bonds for the above amount of \$19,222.65 payable during a series of ten, or twenty years.

Now therefore be it resolved, That the board of county commissioners issue a call to the taxpayers of this county for a meeting to be held in the county court house Tuesday, February 9, 1915, at the hour of 2 o'clock p. m., for the purpose of determining from the wishes expressed by the said taxpayers at said meeting what

manner of payment of the county's indebtedness shall be decided upon; and that the said commissioners cause to be published in each of the three newspapers in this county for a period of two consecutive issues a notice of said meeting, and have printed 200 of said notices and mailed to taxpayers living without the county.

The said motion being duly seconded by Albert Byrner and being put by the chair was carried unanimously.

J. H. SHARP, Chairman,
W. T. HAMILTON,
ALBERT BYRNER,
E. E. HOBLEY, Clerk.

C CLUB BANQUET.

The first annual banquet of the C club of the Carbon county high school was held in the Bayview Hotel Wednesday night. The C club is an organization of the high school athletes. Only those who have been regular members of one of the four major athletic teams are eligible to membership.

President Milton Olsen proved himself to be a very witty and entertaining toastmaster for he was able to get each of the eighteen athletes to arise and make one of them to speak.

Lloyd Woods, an old football man and the club's first president, said the club existed for three reasons: First, to foster athletics by developing athletic talent; second, to raise the standard of athletics by the observance of strict eligibility rules; and third, to strengthen the ties of friendship through closer and more intimate association. Coach M. O. Maughan emphasized the necessity of grit, honesty and clean play to showing that the development of them form the essential qualities of manhood.

Those present were Coach Maughan, President Milton Olsen, ex-President Lloyd Woods, William Thomas, Jack Vignotto, Bert Lee, Hubert Byrner, Clarence Robinson, Arthur Gilson, Harold Leonard, Gus Hudson, Lyle Hatch, Erastus Lee, Clarence Nixon, John Forrester, Walter Lee, and Matt Bradlee.

SHEEPMEN EIGHT BILL.

The sheepmen of the state are making a strenuous fight against the Senate bill which prohibits the acquiring of title to public property by adverse possession or any right or title to any water, water rights or public highway in which municipalities have an interest. The protestants declare that it will take away their right to drive sheep through the canyons by repelling the present law with which it is in conflict. Those who have appeared before the committee are George Austin, C. B. Stewart, John C. McKee, Thomas Austin and Dr. Seymour D. Young.

CATTLE MARKET IS GREATLY STIMULATED

EASTERN ORDERS VERY PLENTYFUL AT ADVANCED PRICES

Packers Shipping Much Stuff to Plains. Sheep and Lambs Decline Sharply. But Recover and Good Stuff Goes to Eight Fifty—Receipts Moderate.

KANSAS CITY, Mo., Jan. 29.—The cattle market was greatly stimulated here when shipping out of Chicago was stopped this week. Eastern orders were plentiful here Wednesday and thereafter, and the market Thursday was called 40 to 75 cents above close of last week, particularly on good heavy fed steers. Medium grades gained some profit also, and butcher grades as well. Stockers and feeders received a sympathetic help from the better market on fat grades, and trading was active at strong prices. On Wednesday 6000 cattle were bought and shipped to the country. Good native fed steers sold at \$5.85 Thursday, and medium and lower grades at \$7.35 to \$8. Quarantine steers brought \$6.35 to \$7.10 Wednesday and Thursday. Opinion regarding the market next week is divided as there is considerable uncertainty respecting the situation at Chicago and other points now prohibited from shipping out live stock. If the present condition extends into next week there will be plenty of orders for good cattle here from Kansas killers, and a good market. Recent cold weather has helped the retail meat trade, and it is now in a healthy state. Illinois cattle have been marketed freely for a month or more, and show signs of getting down to a low ebb, which should point to a strong beef cattle market. But commission men are aware of the facilities of forecasting the market when conditions in the trade are so shift.

Hogs sold ten cents higher today, and are twenty-five cents higher than Wednesday. Disarrangement of ordinary trade channels make quick market changes, and some violent fluctuations are apt to occur next week, most signs pointing to higher prices. However, receipts at all the markets have been restricted this week, and a resumption of normal trading in the country, added to the accumulation held from this week, may prove disastrous next week. Top today was \$4.95, bulk of sales \$4.70 to \$4.90. Packers are shipping many hogs to their plants here bought at up river markets, at prices considerably lower than the range here.

Sheep and lambs declined sharply Wednesday, but have made good gains since, and close the week at the high point, lambs at \$8.50 to \$9.50, best ewes \$6.25 and \$6.30. Receipts are moderate, and no great number are in sight at railroad feeding stations for the first of next week.

Excellent For Stomach Trouble.

"Chamberlain's Tablets are just fine for stomach trouble," writes Mrs. G. C. Dunn, Arnold, Pa. "I was bothered with constipation for some time and frequently had bilious attacks. Chamberlain's Tablets afforded me great relief from the first, and since taking one bottle of them I feel like a different person." For sale by all dealers.—Advt.

DETERMINED BATTLE AGAINST PROHIBITION

(Continued from page one.)

I believe I liberate more men from liquor than any other man in Utah. If I believed that prohibition would prohibit, I would be one of the first to ask for prohibition. I am not delivering the address I had intended to, but I want to call the attention of the members of the legislature to Kansas. I will furnish names upon application. A man who is in business in Wichita told me that drunkenness is on the increase in Kansas and that prohibition does not prohibit.

"He said it had changed beer drinkers to whisky drinkers, and that men were armed with bottles and drank more than they would otherwise. The same story comes from Oklahoma, where prohibition has been in effect since statehood.

"They say Kansas is prosperous? Why is Kansas prosperous? It is because it has the greatest wheat crops in the history of the world, and wheat is high. It is not because it has prohibition. You propose to lessen the revenue of the state and not bring anything into it to help pay the taxes. I have everything here in the mountains, and I say to you that if you increase the taxes one mill you will keep capital out of Utah. The police force of Salt Lake and Ogden, already inefficient through no fault of theirs, will be chasing bootleggers while criminals go free.

As a Moral Issue.
"I am against prohibition as a moral issue. I would rather have the traffic in liquor open than in others. There is a bigger question than property or personal liberty involved in this question. It is the question of our liberties. It was written into the Declaration of Independence that you should legislate on things which are laid in themselves. Do you mean to tell me that to drink a glass of wine is laid in itself? It is not, I say. The prohibition wave in this country has about subsided and the people are returning to sanity.

"You dare not drive capital from this state and you dare not keep tourists from our borders. There is property passing for Utah and you members of the legislature should see it. Whisky will be sold here in spite of any prohibition law you may enact. We are in an age of hysteria and let us, here in Utah, be sane. You cannot change character by legislation. The same wants, the same desires, will be in men and women. If they want drink they will get it. Let us teach our children temperance and be not a state ruled by the peculiarities of a few."

BIG INCREASE IN DEMAND FOR COPPER AND WOOL.

Copper is higher, says Bradstreet's, chiefly on reports of large foreign demands, plus requirements of American manufacturers of war materials, but otherwise demand is very slow. Wool is in active request, and high grade brands are high, the situation reflecting the influence of war demands, especially as exhibited in heavy prospective shipments to Russia. Machinery markets not only hold the creeping improvement heretofore noted, but they have added to it to some extent. Domestic demand is enlarging, small but numerous orders making for volume, while foreign business, which has subsided at some points, has grown at others.

Wool Strong and Active.

There is a veritable "boom" on in medium and crossbred wools at Boston, and the market is being carefully gone over to disclose any little lots which have hitherto escaped detection. Foreign crossbreds are very scarce, and most of the week's sales were South American. Total transactions are estimated at 500,000 to 1,000,000 pounds. Included in this was a large volume of South American lamb's wool, taken by American buyers this year to an unusual extent. Merino wools are being released from embargo in both Australia and London, total permits in the latter market being for two thousand bales. Some wool is on the way in this country from Australia, and another load has been chartered to sail February 6th for a special trip from Australia to Boston via the Panama canal. Domestic wools are selling as freely as limited stocks will allow. Pulled wools are especially strong, being most wanted by mills having army contracts. Carpet wools are also in demand for the same purpose, at advancing prices. All values are very strong, not only for pulled and scouring, but also for greasy and territory wools. Dealers and growers are still at odds in regard to contracting the new clip wools, and apparently less has been done than for some years.

STATE FUND FOR TEACHERS.

School teachers of the state will be paid from a state fund to be created for that purpose, if a bill which is being drafted by the revenue and taxation committee of the house is passed by the legislature. The small number of the state have not been able to pay their teachers for a 24-week term without calling on the state for aid and the committee believes that the state should pay all teachers, taking its proportion of the taxes from each county. Whether either of the first and second class should come under the provisions is a matter under discussion.

The Advocate is informed that the new water system installed at Helper is not providing entirely satisfactory and that much of the recent work in the filtering reservoir is rapidly disintegrating.
